Profile

I have 10 years of experience as a PHP developer and have been working in the field since I graduated from my bachelor's degree. As a developer, I have worked on both small and large projects.

I have proven expertise in easing development pains like routing, authentication, sessions and caching, and web app development through Laravel Framework. A W3Schools certified PHP developer with expertise in HTML/CSS, JavaScript, and MySQL, I am capable of building responsive web and app designs to improve customer experience.

I am able to work independently as well as collaboratively with others on teams.
